

## Florida Highway Patrol Selects Panasonic 360-Degree, In-Car Video Solution for 2,142 Law Enforcement Vehicles

**NEWARK, NJ** (July 25, 2018) Panasonic System Solutions Company of North America, a leader in connected solutions that support law enforcement and public safety, announced today that it has been selected to provide the Florida Highway Patrol (FHP) with the Panasonic Arbitrator 360°™ MK3 In-Car Video solution for 2,142 law enforcement vehicles.

Panasonic will provide FHP with a customized solution including the In-Car Video and its installation, as well as the software and data storage to ensure that critical information is stored and accessed correctly. The key components of the FHP solution will be:

- Customized video camera equipment for patrol cars, SUV's and motorcycles configured for 360-degree video coverage: front, side and back seat Arbitrator 360° HD rugged in-car digital video recording cameras positioned to capture the vehicle's perimeter and focused on the passenger/prisoner transport areas, equipped with active infrared (IR) or low light capability
- Voice-activated microphone with wireless capability to manually trigger video recording remotely; microphone minimum range of 2,000 feet from the vehicle-mount
- Cloud video storage
- Video offloading capabilities that allow for remote off-loading via 4G LTE Network
- Secure and easy video share for internal and external stakeholders
- Video redaction capabilities

"FHP's 360 degree In Car Video solution is exciting because it provides optimal video capabilities around the trooper's entire vehicle. Law enforcement agencies require flexibility to adapt as operations change, and we know that a one-size-fits-all option won't work," said Paul Bazzano, Director, Panasonic Security Solutions Group. "Panasonic has worked closely with the FHP to provide technology solutions that deliver the best results to support their mission, and to help improve officer safety throughout the state."
