

License Plate Recognition Plug-in

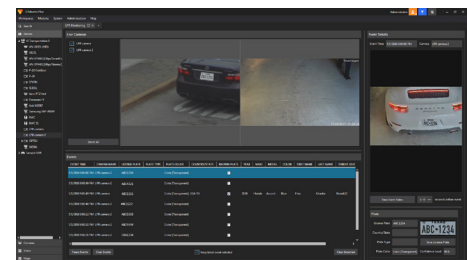

Capture license plates day and night – in any weather condition* – with the Video Insight License Plate Recognition (LPR) Plug-in.

The New Video Insight License Plate Recognition (LPR) plug-in allows you to automate license plate reading and identification. The new LPR application makes it easy to capture license plates, helps identify vehicles, and enforce parking restrictions under even harsh conditions.

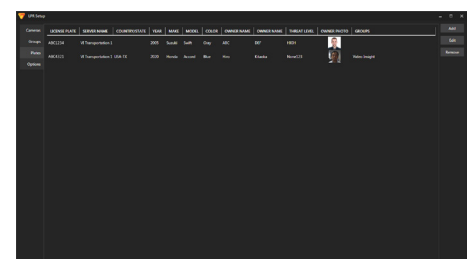

KEY FEATURES

- Unlimited license plate recording
- Support for over 3,000 camera models with about 150-200 recommended models
- Works with all U.S. and International plate information
- Advanced search box — filtering tags by day/range
- Trigger rules/actions based on license plate designations
- Assign plates to specific cameras/rules
- Multiple databases of plates tied to rules manager
- Specify region or capture entire image
- Access Control Integrations with MonitorCast 4
- Multiple plate reading

*Depending on camera performance and standards

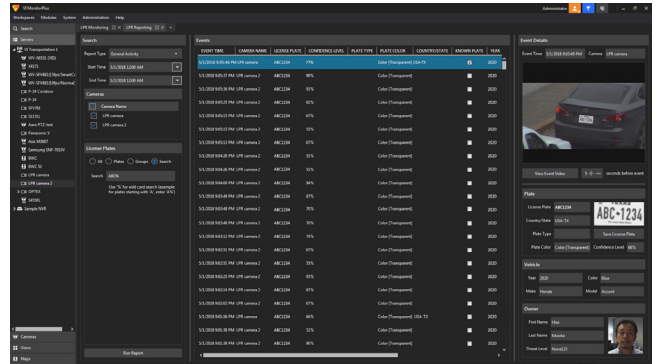

Monitor Unlimited number of LPR cameras and plate reads in real-time

Refine your LPR camera, and system settings with the Built-in configuration tool

LPR RULES MANAGER

- Allows you to create an unlimited number of groups of licenses
- Trigger rules based on groups
- Actions include: alerts, outputs, emails, video pop-ups, instructions and layout change.

Built-in Search functionality, makes finding a Scanned Plate quick and Easy
